

CORSA 550 ml

Technical Data:

- diameter: 74 mm
- capacity: 550 ml
- height: 200 mm

Bottle body: Food-grade polyethylene

Cap: Food-grade thermoplastic rubber and polypropylene

Food-grade characteristics: complies with European EC and American FDA standards relevant to contact with foodstuffs

BPA Free: the elements making up the bottle are completely BPA (bisphenol A) free

Recyclability: the materials used are 100% recyclable in the normal recycling flows

Characteristics:

Corsa features a sporting and functional design.

With a standard diameter of 74 mm it can be used with all conventional bottle cages available on the market. In the upper part, the slightly narrower body and the cap with a series of rings facilitate gripping and holding the bottle even in extreme conditions.

The new large opening enables quick filling of the bottle with supplements and beverages as well as easy cleaning.

Particularly suitable for sports-competition use, the Corsa cap has three functions:

- a new push-pull valve in soft rubber for easier opening and closing while riding
- screw opening for cleaning and filling
- safety fit opening to minimise hindrance in case of accidental impact with the wheels
