

L'Esaiica

timeless glory

timeless glory

A line of products for those who wish to relive the glories of legendary champions who made cycling history with blood, sweat and tears

Bottle

*Materials and designs based on the bottles
of legendary cycling champions*

Materials:

Bottle body: aluminum

Cap: cork

Dimensions:

Capacity 600 ml

Diameter 74 mm

Height 215 mm

Features

Classic Design: the shape of the aluminum bottle – every single one is handmade - matches those you see in old, early 20th century classic cycling black and white photos. A string connects the cork cap and the bottle, just as it happened in days of yore.

Finish: the external part is satin-finished, giving the bottle a unique look. Decals have been manufactured with great accuracy for a unique and elegant bottle.

Suitable for food contact: the internal paint is suitable for food contact, safe and long lasting.

Bottlecage

Materials and designs based on the bottles of legendary cycling champions

Materials:

Aluminum, rubber inserts and stainless steel screws

Features

Classic Design: the handlebar-mounted aluminum bottlecage has the same classical shape as those historic ones.

Finish: the bottlecage is made in opaque, satin-finished aluminum where the EROICA logo is carved, for an instantly recognizable product.

Firm grip on the bottle: the bottlecage features a lever-closing system that holds the bottle steadily even on those dirt roads where many classic cycling competitions are still being held. It can also be adjusted based on the bottle diameter, so you can use bottles that range from 70 to 78mm in diameter.

Easy to use: it's preassembled, needs no specific tools and includes all the screws you need to install it on the bicycle.

Available in the single (one bottle) or double (two bottles) versions
